SUMMARY

Software Developer with professional experience in software development, web application development, technical support, and digital solutions. Skilled in developing and maintaining websites, building custom software, and delivering reliable technology solutions. Adaptable, detail-oriented, and committed to creating high-quality solutions in fast-paced environments.

WORK EXPERIENCE

Annotator **July 2026 - Present**
Tuklas

- Annotated rocks across image frames for AI-based object detection and recognition.
- Collaborated with the team to ensure accurate and consistent annotations for AI development.

Software Developer **January 2026 - Present**
Infraspex Inc

- Engineered custom software solutions for internal operations and client requirements.
- Developed, maintained, and optimized web-based systems and the company website.
- Improved system performance, reliability, and functionality through enhancements and bug fixes.

Virtual Assistant **January 2026 - Present**
Lotus Tickets

- Handled sales, order processing, and customer support.
- Collaborated with cross-functional teams to achieve business goals.

Project Technical Specialist I **January 2025 - December 2025**
Mindanao State University - Iligan Institute of Technology

- Developed and optimized the organization's official website and internal systems.
- Enhanced software functionality and performance through continuous improvements.
- Provided technical support, system maintenance, and troubleshooting.
- Produced technical documentation, reports, and presentations.

Research Assistant **August 2024 - December 2024**
Mindanao State University - Iligan Institute of Technology

- Developed and maintained a research project system with real-time data integration.
- Integrated database systems to enable dynamic website data display.
- Supported project development through technical coordination and research activities.

Video Editor **2021 -2022**
BFJ Studious (Internship)

- Edited travel content for Instagram, TikTok, Facebook, and YouTube.
- Created engaging videos showcasing travel adventures.
- Produced content that inspired and connected with global audiences.

EDUCATION

Bachelor of Science in Computer Application major in Internet of Things **2020 - July 2024**

- Mindanao State University Iligan Institute of Technology
- Magna Cum Laude

Information Technology **2018 - 2020**

- Iligan Computer Institute
- With High Honor

TECHNICAL SKILLS

- **Programming**: *JavaScript, Python, PHP, C, C++*
- **Frameworks & Libraries**: *React.js, Vue.js, Node.js, Vite*
- **Database Management**: *MySQL, SQL, Cloud Databases*
- **Web Development**: *Full-Stack Web Development*
- **Hosting & Deployment**: *Vercel, Render, Hostinger*
- **Tools & Technologies:** *TIBCO, Git, GitHub*
- System Maintenance & Technical Support
- UI/UX Design
- Technical Documentation
- Video Editing
- Digital Marketing & Social Media Management
- Microsoft Office: Word, Excel, PowerPoint, ClickUp

ADDITIONAL SKILLS

- Problem Solving
- Analytical Thinking
- Team Collaboration
- Communication
- Project Coordination
- Adaptability
- Time Management
- Attention to Detail
- Customer Service
- Fast Learner

PROJECTS

Infraspex *(DOST-Funded Project)*

- Developed a drone and LiDAR-based infrastructure inspection system enhanced with AI for high-precision data collection, structural assessment, and infrastructure safety monitoring.

  Key Features: *Drone-LiDAR Integration • AI-Powered Inspection • Infrastructure Assessment • Data Visualization • Inspection Monitoring*

Bridge, Road, and Infrastructure Inspection System

- Developed a centralized inspection platform for managing infrastructure inspections, damage monitoring, and report generation. Integrates AI-powered damage detection, damage classification, GPS-based damage mapping, and automated reporting to support efficient infrastructure assessment.

  Key Features: *AI-Powered Detection • Damage Classification • GPS Coordinates • Inspection Management • Monitoring Dashboard • Report Generation*

Smart Warehouse Management System

- Developed a warehouse management system for monitoring sack inventory and streamlining receiving, dispatch, and return processes. Implements FIFO inventory management, analytics, and AI-powered bag detection to improve inventory accuracy and operational efficiency.

  Key Features: *Sack Inventory Tracking • FIFO Management • AI-Powered Bag Detection • Dispatch & Returns • Inventory Analytics • QR Code Tracking*

Smart Warehouse Monitoring & Analytics

- Developed a continuous warehouse monitoring platform integrating sensor data and recurring inspections to detect environmental and infestation risks. Provides real-time sensor monitoring, automated alerts, and analytics to support proactive warehouse management.

  Key Features: *Sensor Monitoring • Infestation Detection • Automated Alerts • Inspection Tracking • Real-Time Analytics • Risk Monitoring*

Centralized Weather Prediction and Monitoring System for Flood-Prone Cities *(DOST-Funded Project)*

- Developed a centralized platform that aggregates weather and water-level data from multiple monitoring stations across Iligan City for real-time environmental monitoring and flood preparedness.

  Key Features: *Real-Time Monitoring • Weather Data • Water-Level Monitoring • Multi-Station Integration • Flood Monitoring*

Human Resource Information System

- Developed a centralized HR management system for managing employee records, payroll, attendance, leave, government contributions, and 201 employee files. Includes an employee portal for accessing personal information and HR-related services.

  Key Features: *Employee Management • Payroll • Attendance & Leave Tracking • Government Contributions • 201 Files • Employee Portal • HR Dashboard*

PROJECTS

School Student Management System

- Developed a secure student management platform for real-time attendance and transportation monitoring. Features include student time-in/time-out tracking, parent access to attendance records, administrative management, and school bus location monitoring for improved student safety and visibility.

  Key Features: *Real-time Attendance Tracking • Parent Portal • Student Records • School Bus GPS Monitoring • Administrative Dashboard*

Developing a Smart Drainage Waste Management and Notification System: Innovating Sustainable Urban Waste Management *(A Thesis)*

- Developed an IoT-based smart drainage system designed to monitor waste accumulation, improve waste collection efficiency, and support sustainable urban waste management.

  Key Features: *IoT Monitoring • Waste Detection • Automated Notifications • Sensor Integration • Data Monitoring*

Object Detection *(College project - Artificial Intelligent System)*

- Developed and trained a real-time object detection model using YOLOv8 and Edge Impulse to identify and classify individuals from image and video data.

  Key Features: *YOLOv8 • Edge Impulse • Computer Vision • Image Processing • Real-Time Object Detection*

Sumobot Competition *(College project - Robotics)*

- Designed and built an autonomous sumo robot using microcontrollers, ultrasonic sensors, and IR sensors for object detection and navigation, achieving 4th place among 8 competing teams.

  Key Features: *Microcontrollers • Ultrasonic Sensors • IR Sensors • Robotics • Autonomous Navigation*
